

NEW FOR DYNAVOX V/VMAX AND EYEMAX USERS

# Speaking KeySpell V

**Introducing a new way to spell and speak,  
Speaking KeySpell for the Dyna-Vox V-series  
products—V/Vmax and EyeMax.**

*Crusayne Technologies produces software products that assist in the use of technology for all technology users.*

*Look for other AAC software add-on products, slate PC software and eye tracker applications. Contact us at (317) 885-1207 for additional information. Investors welcome.*

## **Speak quickly and efficiently!**

- Lower button count reduces visual scanning targets
- Scanning users have fewer targets to scan
- Unprecedented ease of spelling for EyeMax users
- Word Predicted buttons display words based on user settings
- Resizable for user ease of access
- Num Lock displays standard keypad format for numeric data entry
- Send text window message to your open application or speak completed message
- All device access settings apply including selection methods, word prediction settings, etc.
